Metalista

Definition

The Metalista font was created as a sign of undying admiration for the persistence of heavy metal culture. The angled font of almost fixed width proportions combines capitals with small letters for more variety and better definition of individual letters. Stressing the horizontal strokes subdued the historical Gothic character and emphasized a more modern signature, which is far different from the majority of current attempts at a modern adaptation of Fraktur fonts. We offer Metalista in three styles, or rather widths to be exact: Speed is inspired by the whiplash pace of 70s and 80s speed metal, and can tell and perform a lot even in a very small space; uncompromising Death balances on the fine line between expression and readability; and Metalista Black is the universal go-to, whether as megalomaniacal titles sprawled across the entire LP cover or as tiny texts for glam rock CD booklets.

Basic info

OpenType Features

Number of fonts in a family: 3
Number of glyphs per font: 401
Release date: 2008/2016

Fractions (frac)
Localized Forms (locl)
Case Sensitive Forms (case)
Stylistic Sets (salt ss01, ss02)
