

Tabac Big

Definition

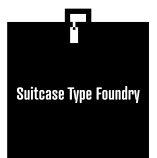

Those who have grown tired of text typefaces insensitively blown up to the size of a poster or a building facade should from time to time try out extreme display styles, which are designed precisely for this purpose. They look best in dimensions from around 32 points out to infinity, and they rise to the occasion when a strong impression is necessary. This is especially true for the extreme weights Hair and Black, which don't allow for any compromise. The sharp hairline and brutal contrast of the strokes test the most extreme possibilities, without having readability suffer in continuous text, as is characteristic for all the typefaces of the Tabac superfamily.
