

Tabac Micro

Definition

The development of Tabac Micro kept to the guides governing micro typography – a methodology for good legibility of small texts. It is above all a raised x-height that optically enlarges the image of the typeset text, looser side-bearings, a broader basic space, or a substantially higher punctuation that does not disappear, even in a tiny nonpareil. We condensed all letters to prevent the typesetting from occupying more space than other font styles. Tabac Micro also contains basic shape variants of selected characters that prevent confusion with similarly constructed characters.
